

Ultra Bond 520 Laminator With optional in-line sheeter
Digital and offset

Introducing the Ultra Bond 520 laminator with optional in-line sheeter.

Designed and manufactured in Australia the Ultra Bond 520 is your new in-house laminating solution.

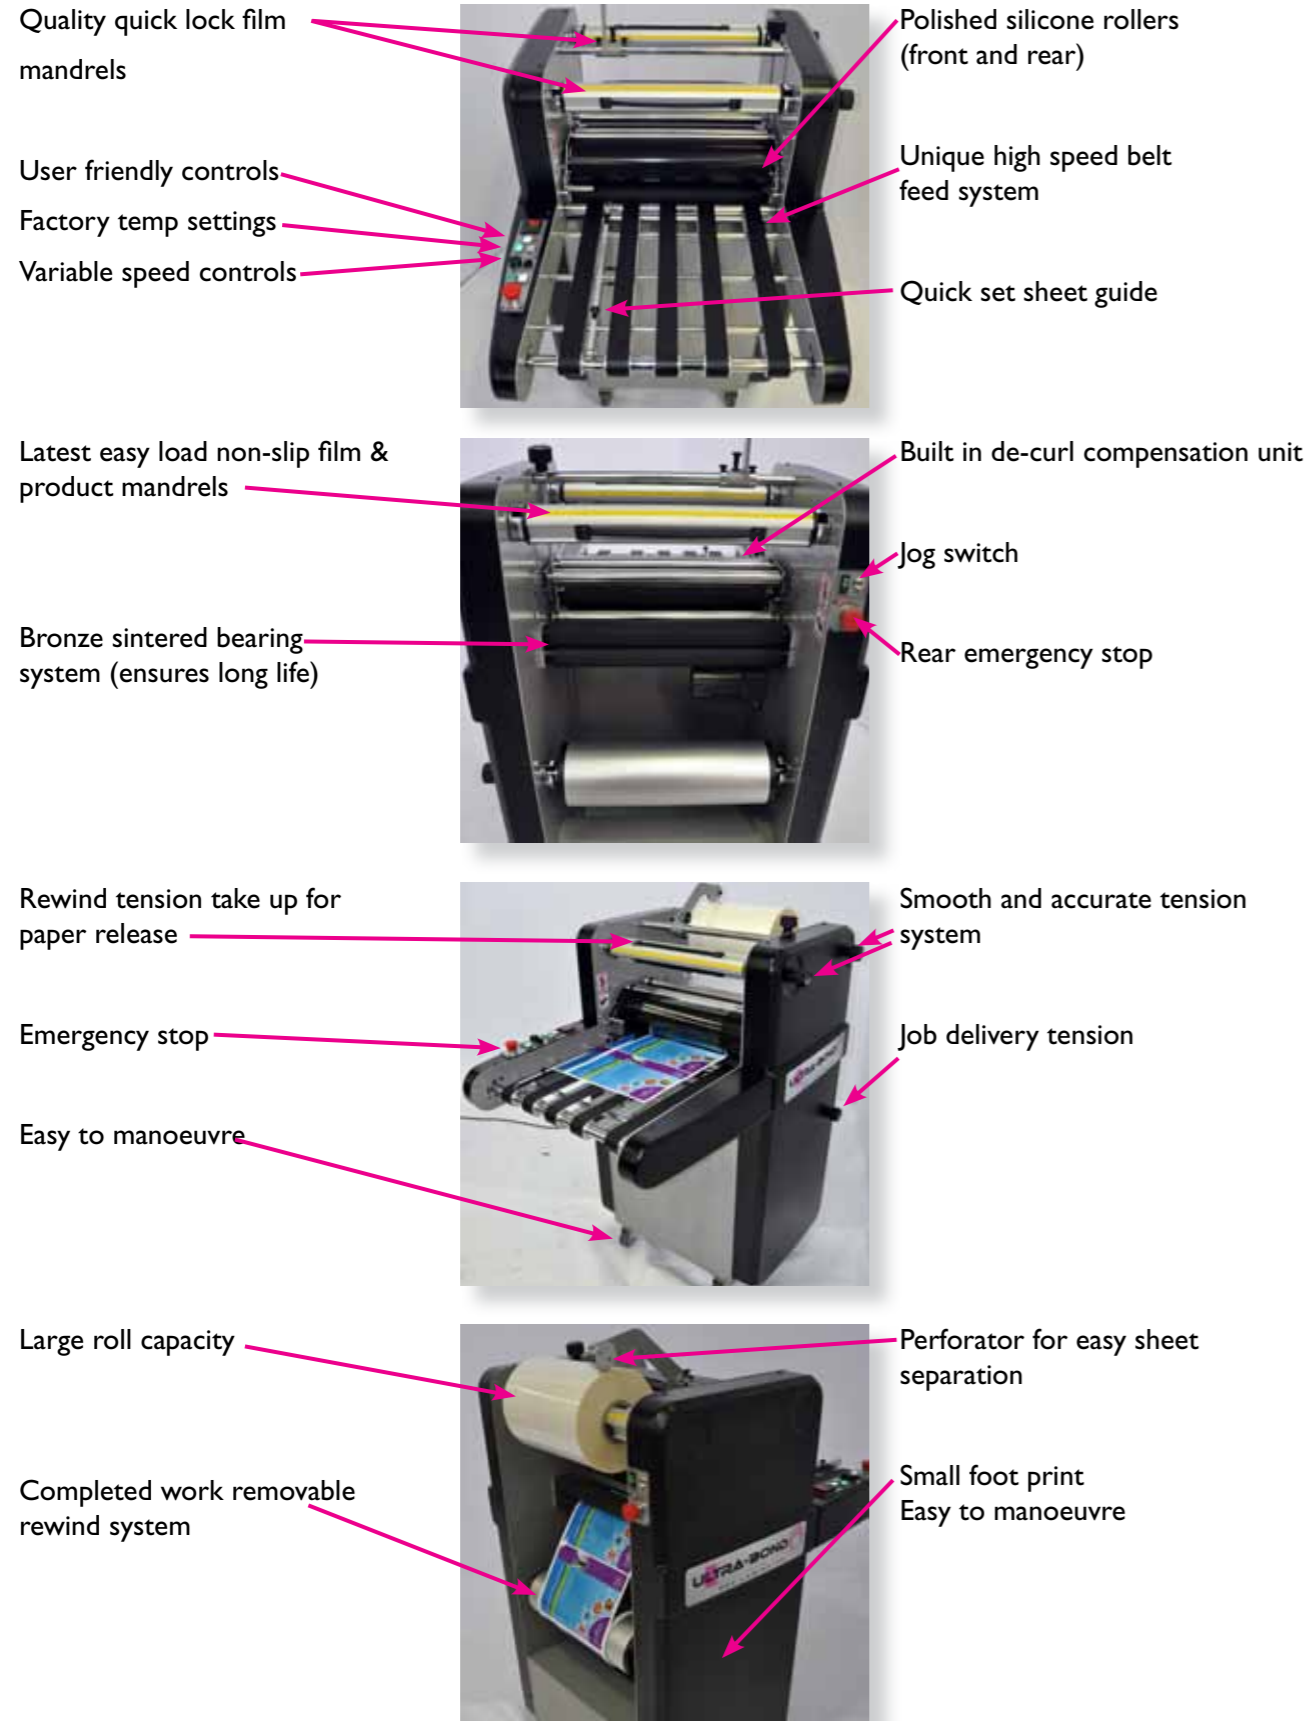

Ideal for finishing both digital and offset output, this single operator machine will deliver a perfect finish every time.

- Save time
- Save money
- Control your quality
- Single operator driven
- Small Footprint
- Easy to manoeuvre
- Plasticoat and celloglaze
- Digital and offset printing

The benefits are clearly obvious . . .

The Major Design features
Ultra Bond 520 Laminator

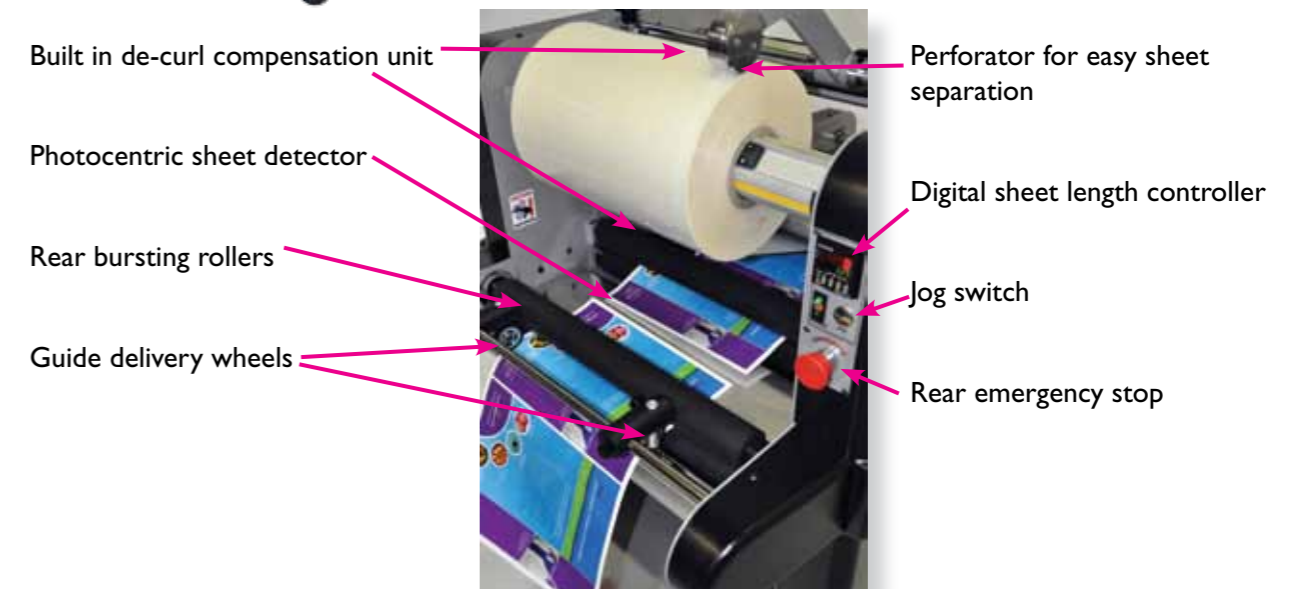

The Major Design features
Ultra Bond 520S Laminator with in-line sheeter

The Ultra Bond 520S with in-line sheeter is a break through in sheet separation technology. The compact design allows a single operator to streamline the laminating process by bursting and separating the laminated prints in-line. The Ultra Bond 520S with in-built compact digital sheeter is the only machine of this size and price range with the capacity to separate any sheet length with the simple press of a button.

Designed and manufactured in Australia, this remarkable machine represents over 20 years of laminating experience and has incorporated technology and design features never before seen in the industry. Operated without the need for compressed air and utilizing standard 240V power supply the capabilities and price of the Ultra Bond 520S will be sure to impress.

Specifications

Max. sheet width	520 mm
Max. sheet length	720 mm plus
Max. Machine Speed	1650 A3 per hr
Metres per minute	9 metres per minute
Power	240V / 15AMP single Phase
Machine Net Weight	
520	150 KG (Palletted) 190 KG
520S	180 KG (Palletted) 220 KG
Machine Dimensions	
520	1100mm (W) x 830mm (D) x 1400mm (H)
520S	1300mm (W) x 830mm (D) x 1400mm (H)
No need for compressed air	
Single operator only required	
Suitable for Digital or Offset printing	
Plasticoat and celloglaze	
Small footprint, manoeuvrable machine	

"We have been using the Ultra Bond laminating film on all our digital printed products. We have tried other films but they do not compare with the Ultra Bond. The reason we continue to use this film, is that we can laminate a job with complete confidence, knowing that when a job is in the market place, the film will not lift, crack or fail to enhance the printed job in any way."

John Housey - M.J. Printing PTY, Ltd. Melbourne Australia

"The Ultra Bond Product is quite simply the best lamination film for digital print. The finish is superb and we have no problem, guaranteeing that this product will not lift or bubble. Our clients love the results."

Keith Lowman - Capital Print Finishers Canberra, Australia
